

8000X7

Power Amplifier

Specification

The 8000X7 is a genuine one-box, seven channel power amplifier, capable of handling even difficult loudspeaker loads.

The 8000X7 home theatre power amplifier delivers 7 x 100Wrms power. However, you can also run it in five or six channel mode too. By bridging two channels it is possible to create a more powerful single channel - especially useful if your front left and front right speakers are more performance critical than the other speakers in your 5.1 system.

“Unobtrusive, with an elegant simplicity, the 8000X7 is a compact yet powerful performer.”

8000X7	Power output	7 x 100W into rated load impedance (8 Ohm) 5 x 100W and 1 x 150W (8 Ohm) 3 x 100W and 2 x 150W (8 Ohm)
	IHF toneburst power	7 x 120W (8 Ohm)
	Input for rated power	1.05 Vrms
	Input impedance	47 kOhm
	Gain	+29 dB at 1 kHz
	Signal to noise	better than 90 dB (relative to 0 dBW) unweighted
	Frequency Response	1.5 Hz - 150 kHz (-3 dB)
	Input connector	RCA
