AirStream**10**

Internet / Wi-Fi, DAB, FM Radio System

Access more. Anywhere you want.

AirStream 10 is a brilliant new way to enjoy radio. Combining the power of the Internet with an uncomplicated user interface and luxury design, AirStream 10 lets you experience over 15,000 Internet radio stations, global music services and every music file on your home network. It gives you full digital DAB as well, and a port for your MP3 player and hi-fi system. It even reaches into analogue to give you FM with RDS.

With its sleek radical contours for a choice of orientation in any setting, the completely versatile, utterly flexible and refreshingly compact AirStream 10 will bring the world's music, in astonishing detail, to your fingertips in any room.

The design of AirStream 10 is simply not just a case of being different for the sake of it. The unique shape enables you to utilise two different rotational options improving it's versatility around your home; stand it on a shelf, close to a wall, or lay it flat on a bedside table, it's up to you? What's more, the use of high quality materials like real wood veneer and aluminium casework, greatly improve the sound quality and durability of AirStream 10, providing a stylish look and quality feel that will sit perfectly in any traditional or contemporary interior space.

Find true expression.

Monitor Audio's Platinum loudspeakers are engineered to achieve the most natural sound possible. Every component part is produced to exacting standards and each speaker is carefully hand-built by our small team of technicians. The Platinum Series represents the epitome of British design and quality, demonstrating Monitor Audio's devotion to music and film sound reproduction. It is these exacting high standards of quality design, build and performance that can be found in the AirStream 10 and across our range of loudspeakers.

Astonishing detail at your fingertips.

Design for sound.

Wi-Fi

Wi-fi – The AirStream 10 uses Wi-Fi technology to automatically stream Radio Stations and music files from a computer or hard drive where you have music files stored. This prevents the use of unsightly wires and lets you benefit from placing the AirStream 10 anywhere in your house or office where you have a wireless router. (Note: an Ethernet cable is supplied with the AirStream 10 to link it up with a standard router to access the Internet, if you do not have a wireless router.)

Internet Radio – Internet radio is the accumulation of thousands of radio stations all being broadcast over the World Wide Web. They consist of major national stations, regional stations or even tiny stations that only broadcast over the Internet. The wonderful thing about Internet radio is the variety; there is so much choice! AirStream 10 allows you to search by name, location or genre, so finding what you want through the thousands of stations is quick and simple.

DAB – The difference between DAB and a conventional AM/FM radio broadcast, is that DAB is transmitted digitally resulting in a high quality audio sound*, without any hiss, fading or crackle. In DAB mode, AirStream 10 will automatically scan and find all the available stations for you, showing all the broadcast information on screen. For a list of stations available in your area please visit <http://www.getdigitalradio.com/whats-on-dab>

*Note: the sound quality is dependant on a strong signal strength, signal strength can vary from area to area.

Interface – The AirStream 10 features advanced technical software that will let you listen to Internet, DAB and FM radio stations. Yet to navigate and use, AirStream 10 is exceptionally intuitive. Browse the menus via the central control dial, and touch sensitive buttons and view it all on the clear black and white LED display. The AirStream 10 may be packed full of advanced technical features but its clean layout and ergonomic functionality make it quick and easy to use.

Build – Through careful development and attention to detail, and using only high quality materials normally found on our more advanced hi-fi loudspeakers, the design of the AirStream 10 envelopes our core design principles. From its strong, ultra low-resonance aluminium shell, to the touch sensitive menu buttons and ergonomic central control dial. AirStream 10 redefines the ‘compact radio’ through high quality materials and superior fit and finish.

Performance - The basis of the AirStream 10 was to offer as much versatility from a radio as possible. This is not only executed in the design, where form most certainly follows function, but also from decades of audio expertise and advanced audio simulation modeling we have developed a driver to pull every last detail from the audio content available.

Specification.

- Internet radio (IP) with 'podcast' or 'on demand' content.
- RJ45 Ethernet network connector – For wired operation.
- Wi-fi with high gain antenna. 802.11b/g – WEP, WPA, WPA2 security
- Music player with streaming capability from network connected storage devices such as: NAS (network attached storage) device, or computer.
- Automatic firmware/software updates via internet.
- UPnP support (Universal Plug 'n' Play)
- DAB (digital) radio (UK version only)
- FM radio with Full Band III reception (Band III 174-240 MHz, FM 87.5-108 MHz.) with RDS functions.
- Speaker: Full-range 3.5" in-house designed woofer.
- Audio power output: 7W Class A-B amplification.
- Output connectors: 3.5mm Headphone socket, 3.5mm Line out socket – For connection for play back through a hi-fi system
- Format support for: MP3, WMA, Real Audio (RA), AAC
- Input connectors: 3.5mm Auxiliary input - for iPod or MP3 player connection, 12V DC power adaptor socket.
- Display: 6 line LCD display with white backlight.
- Controls: 6 one-touch mode/function buttons, central navigation control knob including play, pause, forward, back buttons.
- Presets: 4 presets for FM, Internet and DAB radio stations.
- Internet Radio Portal: Search and save stations by name, favourites, country or genre.
- EQ settings: 6 preset sound EQ settings, (Optimum, voice, classical, pop, rock, dynamic)
- Alarm: Dual alarm and clock function - Memory stored after power removed.
- Aerial: Telescopic Aerial with hinge (for DAB/ FM reception). (Not required for Internet radio or music streaming)
- Mains power supply: Mains powered adaptor input: 100-240V ~ 50/60Hz 0.4A. Output 12V DC 1.5A
- Power consumption: Standby 1.9W Max 18W
- Dimensions (mm): 125 high x 330 wide x 95 deep
- Product Weight: 2Kg
- Approvals: CE/UL/Fcc. Compliant with the EMC and Low Voltage Directives (89/336/EEC and 2006/95/EC).

Sound everywhere in your home.

Music is an intrinsic part of life yet all too often the sound we hear is stripped of its inspirational quality by speakers that simply aren't up to the job. Nothing generates Muzak faster than an overstressed loudspeaker chosen purely to match a wall colour or to occupy less space. But the good news is that high quality sound and designer looks are not mutually exclusive. Monitor Audio has proved that you can strengthen your emotional contact with music and your love affair with décor in every room in your home.

Our versatile range of hi-fi, home theatre and discrete architectural speakers are designed to feel as comfortable as your hand in a glove, but deliver the sonic superlatives with a breathtaking authority. Whatever your taste and budget, you'll discover a Monitor Audio speaker system that, with a combination of superior design and build, answers your desire for great sound and exceptional style.
