Slimline Music Systems

iPod not included

MC-DX460iDAB

SLIM MUSIC SYSTEM WITH iPod DOCK AND NXT SPEAKERS

TEAC's advanced CD music systems now embrace your iPod, and with the supplied iPod dock, your music and video archives get a new lease of life. A newly designed powered subwoofer delivers 10 watts of deep bass, while the ultra-thin, smooth-sounding NXT speakers relay a further 10 watts. As a result, you hear clear and expansive sound, far removed from the sound from small earphones, and you enjoy crisp, wide imagery, normally impossible to realise from the iPod's small screen. This product, available with a DAB/FM tuner, heralds a new era in flexible home entertainment.

Functions: iPod, CD, DAB, FM, AUX

Dimensions, Weight: Main Unit 255 (W) x 169 (H) x 144 (D) mm, 1.4kg
Speaker 210 (W) x 169 (H) x 81 (D) mm, 0.7kg
Subwoofer 170 (W) x 195 (H) x 240 (D) mm, 4.0kg

Colour: Black

The Secret of Creating an Ultra-Thin Speaker

NXT's unique technology in devising an ultra-thin speaker system can be described in two parts. One – the core feature of this technology – is called the exciter.

This transforms the electronic signal from the amplifier into vibration. Another characteristic is the flat panel, which emphasizes and transfers vibrations from the exciter in to the air. The material used in the manufacture of this panel is an important factor, with a great influence on the sound quality. TEAC uses an ultra light, yet hard, material – a thin aluminium honeycomb panel covered with paper on both sides. This generates the very best sound quality available from such a neat and compact unit.

MC-DX40DAB

SLIM MUSIC SYSTEM WITH NXT SPEAKERS

This may look like just another design-oriented audio system but, being a TEAC product, its performance is as striking as its appearance. Combining NXT speakers and a subwoofer, the MC-DX40DAB delivers exceptional sound quality. A 10W + 10W amplifier delivers a lucid sound through NXT speakers, while an impressive subwoofer with an output power of 15W completes an exceptional sonic balance. Using the NXT speakers means that they can be positioned to suit both the space and sonic requirements of the listener.

Functions: CD, DAB, FM, AUX

Dimensions, Weight: Main Unit 247 (W) x 169.5 (H) x 83 (D) mm, 1.3kg
Speaker 210 (W) x 169.5 (H) x 85 (D) mm, 0.6kg
Subwoofer 170 (W) x 220 (H) x 325 (D) mm, 4.8kg

SR-3DAB

CD RADIO WITH USB/SD AND iPod DOCK

This handsome tabletop CD-Radio defines compact audio for iPod and iPhone without missing incoming calls and texts. Touch-sensitive control panels allow you to operate the unit in a smart way with good visibility in the dark, while a slot-in CD player gives effortless performance. As well as its classy appearance, the sound performance is stunning. To maximise the performance, the cabinet structure is derived from a timeless conventional bookshelf speaker design. A DAB/FM tuner delivers music and speech programmes from local stations, while a USB and an SD Card slot allows you to playback MP3 music.

Functions: iPod/iPhone, CD, DAB, FM, USB, SD, AUX

Dimensions, Weight: 355 (W) x 125 (H) x 233 (D) mm, 2.7kg

Colour: Black

iPhone not included

SR-2DAB

STEREO RADIO WITH IPOD DOCK

This tabletop radio is great for iPhone users, who are always looking for something new. You can connect an iPhone without setting it to the airplane mode – which keeps you connected to both your mobile phone network and the internet. That means you will never miss incoming calls and texts while playing back music or video on your iPhone. Even with your iPod, you will enjoy stunning sound from your playlist, or enjoy video playback on your own TV. This elegant, compact DAB/FM unit also includes a handy dual alarm function, so that you can set a separate alarm call without disturbing your regular wake-up or reminder signal.

Functions: iPod/iPhone, DAB, FM, AUX

Dimensions, Weight: 322 (W) x 113 (H) x 188 (D) mm, 2.7kg

Colour: Black

Model R-3 PORTABLE DAB/FM RADIO

As soon as you open the box, you will be able to tune in your favourite station with the minimum of effort. Just turn on the radio, tune in, and then adjust the volume. That's it! Stunning sound is delivered from this well-designed and petite radio, which works with either mains or batteries.

Functions: DAB, FM, AUX

Dimensions, Weight: 238 (W) x 127 (H) x 131 (D) mm, 1.4kg

Colour: Black, White

iPhone not included

R-4iDNT DAB/FM/INTERNET RADIO WITH iPod DOCK

This sleek desktop radio offers a great deal. It plays music from your iPhone without missing incoming calls and texts, while you are listening – not just to the iPod but also to radio stations via the internet, DAB or FM. NXT's new BMR speaker technology allows for a slimline build without sacrificing excellent bass response, coupled to crisp midrange and treble. The built-in Internet Radio tuner delivers a multitude of music from around the world while the DAB/FM tuner

also connects you to local stations. In addition, as you playback playlists on your iPod, the music ID will be sent to the Last.fm server, which analyses your musical taste and delivers similar types of music next time you visit Last.fm.

Functions: iPod/iPhone, DAB, FM, Internet Radio, PC Streaming, last.fm, AUX

Dimensions, Weight: 310 (W) x 53 (H) x 210 (D) mm, 1.6kg

Colour: Black

iPhone not included

SR-LUXi STEREO RADIO WITH iPod DOCK AND ROOM LIGHT

This uniquely shaped tabletop audio device, incorporating an iPod dock, is graced with beautiful natural-coloured LED lights, which deliver an extraordinarily relaxed atmosphere to your room when daylight fades. Ingeniously, it helps you wake-up in the morning too, and quite naturally, with a programmed luminance control. This blends light and sound – quite literally. And the aim is to promote a good, relaxed feeling, through glowing radiance, while listening to your favourite music. Good room lighting is an essential part of a relaxed environment to promote a feeling of wellbeing.

The iPod dock is located directly in the centre of the SR-LUXi so that it is well balanced with the smart stereo speakers independently positioned on each side. An intelligent programmed wake-up timer then automatically controls the lights to work as you fall into sleep and wake-up.

Functions: iPod/iPhone, FM, AUX

Dimensions, Weight: 244 (W) x 244 (H) x 104 (D) mm, 1.2kg

Colour: Pearl White

How the Wake-Up Light Works

It is a fact that environmental and surrounding brightness affects people's feelings and moods. People react to sunlight and feel generally happier and more at ease. That's why we all feel better in the light of day than we do in the dark of night. You can set the SR-LUXi alarm 10 or 30 minutes before your required waking time, the choice is yours, and the natural colour of the LED lights gradually become more intense, through the eyelids, sending a signal to your brain, announcing the start of day.

The signal triggers your brain to commence the wake-up process and you become more aware and able to face the rigours of the day with energy. Then, the music from your iPod or iPhone kicks in and you are truly ready for the world! At night it's the reverse as you drift gently to sleep with a soft, fading light, the unit switching to sleep mode automatically, ready for the morning.

Full-Size Components

AG-980 DUAL ZONE STEREO AM/FM RECEIVER

This receiver is designed to deliver multi-zone audio from a simple, affordable unit. With the TEAC AG-980, you can have four pairs of speakers grouped in one Main-Zone and one Sub-Zone, and each zone controlled individually; including selecting the input source, switching speakers on and off and adjusting the volume level. This means the AG-980 is great for commercial premises like pubs, restaurants or shops. For example, a Café-Bistro dining area may be designated as the Main-Zone, with a Beethoven String Quartet playing on CD with the bar/reception area acting as a Sub-Zone for cool funky-jazz from a radio station. Moreover, there is much more to the AG-980. A Sub-Zone Pre-

Out delivers a line-level audio signal to an additional amplifier in a separate location – a garden, for example – while a standard DC-12 V Trigger Out extends the flexibility of the system by allowing on/off from a remote location. Furthermore, the RS-232C provides controllability of every single command of the unit from a third-party remote control. In addition, as a bonus, there is a Phono input included so that audiophiles can share the experience.

Input Selector: Phono, CD, Tape, Tuner (AM, FM), AUX, Video
Dimensions, Weight: 440 (W) x 141 (H) x 330 (D) mm, 8.4kg

AG-790A STEREO AM/FM RECEIVER

A good old-fashioned stereo receiver brimming with the very latest in audio technology. This attractive component delivers 100 watts + 100 watts power to two pairs of speakers and comes with five audio inputs including a phono input to connect your turntable. A quartz synthesised AM/FM tuner incorporated with 30 preset memories allows you to tune in your favourite station with a touch of button, as a large volume control knob brings comfortable operation. In addition, the pair of auxiliary AC outlets is highly

practical and convenient when you set up the system. It may look like a conventional stereo receiver, but its potential is huge. Once set up, it becomes the very heart of a high-performance hi-fi system.

Input Selector: Phono, CD, Tape, Tuner (AM, FM), AUX
Dimensions, Weight: 435 (W) x 144 (H) x 330 (D) mm, 7.4kg

CD-P1160D

CD PLAYER

With a coaxial digital audio output, a pure audio signal emerges from a centre-mounted CD mechanism, which is an ideal structural design for a superior CD player. A clear music calendar in the display keeps you posted on the information you need at a glance.

Dimensions, Weight: 435 (W) x 80 (H) x 280 (D) mm, 4.0kg

CD-P1260

CD PLAYER

It is generally accepted that a centre-mounted mechanism is the most efficient way to stabilise small vibrations in CD playback. Now, this conventional CD player can deliver your downloaded computer-generated MP3 files with clarity and style.

Dimensions, Weight: 435 (W) x 100 (H) x 285 (D) mm, 4.1kg

A-R610

INTEGRATED STEREO AMPLIFIER

Traditional quality audio, particularly in stereo amplifiers, still attracts true audiophiles, despite the changes in audio technology over the years. This classic amplifier delivers 120 watts + 120 watts power to a wide range of speakers, from 4 ohms to 16 ohms – or to compact monitor speakers on a desktop. In addition, you can use two sets of speakers if you want, main and sub speaker sets. A large volume control knob allows you to control precise volume levels with ease. On its own or matched with the TEAC T-R610 AM/FM tuner, which is controllable with a single remote control from the A-R610, this traditionally styled amplifier is a reminder of just how good quality high-fidelity stereo playback is in the modern age.

Input Selector: Phono, CD, Tape, Tuner, AUX, Video1, Video2

Dimensions, Weight: 435 (W) x 142 (H) x 355 (D) mm, 9.7kg

PD-D2620

CARROUSEL TYPE 5-DISC CHANGER CD PLAYER

This handy 5-disc changer with headphone volume control effortlessly plays MP3 discs in addition to standard CDs. The great thing is that once discs are fully loaded in the unit, regardless of the type of disc, be it a standard CD, CD-R/RW or an MP3 disc from your iTunes playlist, you can continuously playback as many as 750 songs*, for as long as 60 hours*, without having to touch the player. This means that, with one single CD player, you can play back entire album collections from some of the world's greatest artists. Both coaxial and optical digital outputs provide flexible connection to digital recorders, while a volume control for the headphone jack is included for added convenience. * Compression rate 1:10

Dimensions, Weight: 435 (W) x 115 (H) x 390 (D) mm, 6.2kg

Full-Size Components

T-R610 AM/FM STEREO TUNER

Although this component looks like a traditional high-fidelity stereo tuner, it conceals refined and reliable technologies within. 30 AM plus 30 FM station presets allow instant and effortless radio station searching and surfing at the touch of a button.

Dimensions, Weight: 435 (W) x 87 (H) x 294 (D) mm, 2.9kg

W-600R DOUBLE AUTO REVERSE CASSETTE DECK

Don't let your cherished audio cassette collection gather dust in the cupboard. This outstanding double auto-reverse cassette deck revives your memories. Tape replay doesn't get better than this!

Dimensions, Weight: 435 (W) x 145(H) x 290 (D) mm, 3.8kg

Vinyl Copy Station

LP-R500 PHONO CD-RECORDER WITH CASSETTE PLAYER

This revolutionary turntable quickly and effortlessly archives your analogue LP collection into digital music files, recording 33, 45, and 78-rpm vinyl records, cassette tapes and even AM/FM programmes onto CD-R/RW discs. A track-increment function transfers the track information to the CD-R/RW, in either automatic or manual mode. The recording-level control, complete with a level meter, is another useful audiophile feature, while the tape section has two tape positions, normal and high.

Digitise Your Archive

If you own a collection of records and cassette tapes – perhaps crammed in the cupboard under the stairs, in the garage, or hidden up in the attic – why not revitalise these vinyl discs and magnetic tapes to play on your car's CD music system or on your MP3 player? TEAC's Phono CD-Recorder transfers from analogue

Moreover, the auxiliary input allows you to connect any source you want to record digitally. Everything you need for music playback is here, including an AM/FM tuner, amplifier and stereo speakers – all housed in a smart black case.

Functions: Turntable, CD, Tape, Tuner (AM/FM), AUX
Dimensions, Weight: 470 (W) x 230 (H) x 390 (D) mm, 11kg
Colour: Black, Woodgrain

to CD. The Auto Track Increment function automatically provides track information to a CD-R/RW disc, by detecting a silent gap between tracks on the record or tape, while the Manual Track Increment deals with live recordings and scratched vinyl. Once your analogue archives have been digitalised, you have them forever.

- MC-DX460iDAB**
Slim Music System with iPod Dock
- Plays CD, CD-R/RW, MP3 discs
