

# Antila II

Recently upgraded from the multi-award winning Antila, the Antila II combines exceptional sound quality with captivating good looks and complete ease of use to create a striking impression in any environment.

The Antila II CD player introduces many unique technical and ergonomic innovations to combine state-of-the-art performance with total ease of use.

Recently updated with a whole new Digital to Analogue board including new circuit layouts to provide decreased noise and improved soundstaging, as well as the use of high quality audiophile components in place of the previous surface mount parts, the performance reaches new levels, particularly in the extreme precision of the bass region; the delicate, analogue-like high frequencies and the expansive yet explicitly focused soundstage.

The Antila II is fully LIPS® compliant, allowing a press of the play button to power up the amplifier(s) from standby and select the CD input. Used in a totally purist, single-source system with the Hydra power amplifier, the Antila II will even control the amplifier's volume via LIPS® commands with the volume display read out in the Antila II's LCD display.

# Antila II

The unique MD<sup>2</sup> Active Differential Multi-DAC technology employs twenty 24 bit / 192 kHz multi-bit Delta-Sigma converters as multiple voltage sources. A fully balanced digital data stream is generated from the CD data and fed to multiple DACs selected for their audio quality. The result is significantly reduced levels of noise and distortion, thereby producing a breathtakingly real musical performance and a tactile panoramic image. LIPS® ensures the ultimate simplicity in use and flexibility for the future.

## Awards

### Hi-Fi Choice: Editor's Choice

"The Antila II is a fast and accomplished performer that is among the most revealing at its price" **Sept 2009**

### Hi-Fi Choice Awards 2009 Winner: Best CD Player over £1,000

"The Antila II is a fast and accomplished performer that is among the most revealing at its price. Build and finish are excellent, with no fewer than 20 DACs. Combine these qualities with its partnering Tucana II amplifier and you have a very welcome addition to the ranks of the British high end." **Oct 2009**

## Technical Details

Drive	Audio optimised tray-loading Philips VAM assembly
Digital to analogue conversion	20 x 24 bit / 192 kHz Crystal CS454x multi-bit delta sigma converters
Analogue output level 0 dBFS(0 dB	Unbalanced 2.3 V RMS load))
Digital outputs	SPDIF Toslink optical, SPDIF RCA phono coaxial
Frequency response	10 Hz – 20 kHz +0.0 / -0.6 dB
Output Noise	> 108 dB below 0 dBFS
Distortion @ 1 kHz 0 dBFS	< 0.002%
Crosstalk (10 Hz – 20 kHz)	Better than -90
Power supply	Nine fully regulated power rails
Dimensions (W x H x D)	440 mm x 110 mm x 310 mm
Weight	12 kg
