Mezzo 9 Subwoofer

Building on the design innovations and successes of its flagship Performance range, Mordaunt Short is proud to bring Mezzo to the market. The Mezzo 9 subwoofer answers the prayers of home cinema enthusiasts the world over: earth shattering bass from a compact and aesthetically pleasing cabinet. With all inputs and cabling hidden underneath the unit, the Mezzo 9 brings a perfect blend of style and design to the market..

The Mezzo 9 employs two 8" CPC continual profile cone woofers arranged in force cancelling mode in a sealed cabinet. Coupled with a 375 watt digital amplifier, these can produce commanding and controllable low frequencies to fill any room. For ease of use, the Mezzo 9 is fully remote controllable, and employs a multiple mode DSP to allow users to customise the subwoofers' output to their individual room requirements listening environment.
