Absolute 845

2010-03-26 17:03:11 admin

- **Technical characteristics**

- Type: Dual mono Stereo Integrated Valve Amplifier
- Stadio di usita: single ended parallelo A class
- Output Power: 40 watt / channel
- Output Impedance: 4 – 8 Ohm
- Inputs: 5 line, 2 tape
- Input Impedance: 47 kOhm
- Outputs: 2 tape, loudspeakers bi-wiring
- Feedback factor: 10 dB
- Frequency Response: 20 Hz – 30 kHz
- Valves: 4 x 845, 6 x ECC82, 2 x ECC83
- Power Consumption: 700 VA
- Dimension: 31,7 x 23,8 x 11 inches
- Net Weight: 199 lbs

- **Reviews**

- [The Absolute Sound](#)
- [Mail Sunday](#)

The Absolute 845 was chosen by “The absolute sound” as best product in 1994.

After 16 years it is still in the absolute place ranking of tube amplifiers drawn by the German magazine Stereoplay with a score higher than any other amp (including Solid state amps). No other HiFi device remained at the top of its category for so long.

The Absolute not only represents the history of Unison but the history HiFi and particularly of the most classic HiFi linked to valve and analog devices which, like Absolute 845 demonstrates, not only “have something to say” but is yet unsurpassed.
