**ALFRED DUNHILL**  
ENGINEERED BY MERIDIAN

## Ultimate design and functionality

The eponymous Alfred Dunhill brand can be traced back to 1893, when Alfred Dunhill took over his father's saddlery business and launched Dunhill's Motorities, catering to the needs of the pioneering motorist. Although the luxury product offering may have grown substantially since that time, certain characteristics have remained unchanged - dunhill products are always distinctive and sophisticated, innovative yet timeless.

This sense of English understatement, elegance and a deep appreciation for connoisseurship led dunhill to Meridian Audio, another English company and one of the world's leading manufacturers of high performance home audio and entertainment systems. Founded in 1977, Meridian has also gained an impressive reputation for product design and quality, with each product built by hand at Meridian's manufacturing facility in Cambridgeshire.

dunhill's customers value style and practicality, two attributes for which Meridian products regularly win awards.

## Powerful audio and visual performance

The Alfred Dunhill AD88 is a complete high performance entertainment system with integrated loudspeakers. Featuring CD and DVD playback, AM/FM/DAB\* radio tuner, dual function alarm clock and 80 watts of digital amplification, the AD88 is an extremely powerful and sophisticated system that offers astonishing sound quality but is very simple and intuitive to operate. Self-contained and remarkably compact, the AD88 also includes a docking station so you can connect your iPod® player and enjoy your digital music library at home. An infra-red remote control with magnetic back completes the impressive package.

### Features

- ≡ CD Player – supports CD, MP3, and WMA (from CD-ROM) formats
- ≡ DVD Player, with S-Video and Composite outputs for connecting to TV or other display device
- ≡ AM/FM/DAB\* radio tuner (\*where available)
- ≡ Dual Function Alarm Clock, allowing you to wake to a gentle chime or your favourite radio station (at a pre-set volume)
- ≡ PC connectivity via mini-optical digital input, and standard analogue mini-jack
- ≡ iPod® Dock
- ≡ Infra-red Remote Control (with magnetic back)

## Uncompromising craftsmanship and reliability

The Alfred Dunhill AD88 is hand built in Meridian's state of the art production facility in Cambridgeshire, England, using very traditional woods and piano lacquers combined with cutting edge electronics and software. World leaders in digital audio, Meridian has an enviable and award-winning reputation for performance and quality. Every product is subject to the most stringent testing procedures at each stage of the manufacturing process, from circuit board printing to final inspection.

This uncompromising approach combined with over 30 years of acoustic and engineering expertise ensures that the Alfred Dunhill AD88 beautifully marries tradition and innovation in the very best British style.

### Technical Specifications

- ≡ 80W 2.1 digital DSP based stereo system with separate integrated sub-woofer
- ≡ LF/MF (AM) and FM stereo reception
- ≡ Band III DAB Digital Radio (where available)
- ≡ Built-in antenna for local stations
- ≡ Two assignable antenna sockets
- ≡ Selection of antenna accessories available
- ≡ 3.5mm digital optical/headphone out
- ≡ 3.5mm aux analogue input (Aux 1)
- ≡ 3.5mm digital optical input (Aux 2)
- ≡ Mini-DIN input (Aux 3) for docking station
- ≡ Slot loading CD/DVD drive accepts CD-DA, CD-R/RW, MP3, WMA, DualDisc, DVD-V, DVDR/RW
- ≡ S-Video and composite outputs PAL/NTSC
- ≡ Radio/tone alarm function
- ≡ Compact infra-red remote control
