

Powerful sound: CINEMA XL Set III

satellite CINEMA 2 SAT features a powerful 19mm Mylar ringdome tweeter with waveguide and integrated phaser for optimum dispersion up to 21000 Hz; the 80mm woofer in aluminium design with broad rubber surround and shielded magnet system provides stunning bass sound!

The tiny centre speaker meets the highest demands within a surround system. It provides a well-balanced and dynamic sound. Elegant aluminium design and hairline finish ensures optical delight for your pleasure! Due to its flat shape, it can be mounted very easily. The new type of wall bracket enables discreet and easy mounting.

The speakers are magnetically shielded and provided with an integrated high pass filter. The new terminals provide inclined sockets for better access, suitable for larger cable diameters of up to 4mm². The wall brackets included with the set allow unobtrusive wall mounting; slender stands are available as an accessory.

Deepest bass sound is provided by the subwoofer SUB 111.2 ESP with lacquered high gloss front baffle and matt veneer cabinet body.

Its special feature is the patented ELAC ESP: ESP® is a frequency and power dependent electronic stabilisation programme for controlled bass performance even in extreme situations. The electronic components ensure that even at maximum power no distortions can be detected. In comparison to conventional active subwoofers, it is almost impossible to overdrive ELAC subwoofers!

Specifications:

	CINEMA 2 SAT (4x)	CINEMA XL CENTER (1x)	SUB 111.2 ESP (1x)
Type	surround loudspeaker	centre loudspeaker	active subwoofer

Woofer	1 x 80 mm cone	1 x 80 mm cone	1 x 200 mm cone AS
Nom/Peak Power Handling	45/65 W	60/80 W	-
Max Amplifier Power	-	-	80 W (Sine), 100 W (Impulse)
Frequency Range	90 ... 21000 Hz	85 ... 21000 Hz	35 ... 240 Hz
Finishes	black brushed aluminium, silver brushed aluminium	silver brushed aluminium	silver
CINEMA XL SET III	Finish: silver, black high gloss		

Surround sound often seems to suffer either from inferior performance, or from monstrous design. A 5.1 system for home theatre and concert performance alike is still a rarity, all the more so if it is supposed to fit snugly into a pleasant ambience. The solution: ELAC's CINEMA XL Set shows that hi-fi sound and inobtrusive, yet eye-catching design need not exclude each other.

The set comes with 4 satellites and a perfect matching centrespeaker in modern brushed aluminium design featuring high-tech drivers and elegant mounting hardware.

The drivers reflect ELACs state-of-the-art-technology: the

ELAC
