

All the music you want. All over your house.

Sonos Controller 200

CR200

Instantly access all your music and rooms at the touch of a finger.

The Sonos® Controller gives you instant, wireless access to all your music and all your rooms at the touch of a finger. The full-color VGA display, ultra-responsive touch screen and dedicated buttons make it a joy to use. And it's 100% dedicated to multi-room music control — pick it up or touch the screen and it's ready to go. With the Controller in hand you can quickly find and play music from your personal music library, Internet radio and the most popular online music services. Browse through albums and stations with a flick of a finger or search for your favorites by typing on the on-screen keyboard. Then, simply touch to play. You can play the same song in every room or different songs in different rooms with ease.

SonosNet™ ensures that every Controller works wirelessly, all over the house, so you don't have to run back and forth to your computer. Instead, you can choose exactly what to play and where to play it from anywhere — sitting on the couch or cooking in the kitchen. Controllers aren't tied to a specific ZonePlayer™, so you can use any Controller to control the music — and the volume — in all your rooms. And there's practically no limit to how many Controllers you can have — one for every room, floor or music lover in your house. The Sonos Controller also includes a Charging Cradle so it's always powered up and easy to find.

Key Features

- Wireless, multi-room control from the palm of your hand
- Touch screen simplicity
- Instant access to endless music
- 100% dedicated to multi-room music control
- New features and music services with automatic updates
- Sonos Charging Cradle 200 included

Sonos Controller 200

Wireless, multi-room control from the palm of your hand

Control all your music and all your ZonePlayers from the palm of your hand. Control of your music is not tied to the room where you're listening so you can control what's playing in every room in your house from anywhere in the house.

Touch screen simplicity

Quickly find and play the music you love with the ultra-responsive touch screen display. Scroll through your music library and radio stations with a flick of your finger. View album art while browsing. Instantly find an artist, song or station by typing on the on-screen keyboard. And change the volume in any or all your rooms by swiping your finger across the screen.

Instant access to endless music

With the touch of a finger you can find and play songs from your personal music library stored on your computer, plus thousands of free Internet radio stations. Sonos also works seamlessly with the most popular music services so you can stream millions of songs and stations from the Internet to the rooms of your choice.

100% dedicated to multi-room music control

The Sonos Controller is focused on one thing and one thing only — controlling your Sonos system. Dedicated Mute, Volume and Zones buttons are shortcuts to the things you do most. The Controller responds instantly — simply pick it up or touch the screen. And the high-capacity battery lasts an incredibly long time so you won't have to recharge in the middle of a party.

New features and music services with automatic updates

With free automatic software updates you'll always have the newest features and music services to enjoy. Which means your system will keep getting better even after you buy.

Sonos Charging Cradle 200 included

The Sonos Charging Cradle keeps the Sonos Controller all charged up and easy to find. Plus, when the Controller is sitting in its Cradle it works like a charm. In fact, it's so useful we included it with every Sonos Controller, complete with an AC Adapter for power.
