- **Full IR remote control (handset included)**
- **HDMI Video output for TV connection**
- **Control from Solo neo or Arcam AV Amps**
- **Stylish cast aluminium case**
- **Charges and syncs your device**

Arcam's rDock series of iPod interfaces have impressed music lovers the world over. Their superb sound quality and stylish good looks have earned them a range of industry awards, not to mention thousands of delighted owners!

The drDock pushes the performance boundaries even further offering greater connectivity, wider compatibility and even better sound through a direct digital connection to the docked device. Thanks to an ingenious new shape the drDock is able to accommodate iPads as well as iPods and iPhones allowing an even wider range of apps and services to benefit from Arcam's legendary sound quality.

The drDock's talents aren't just limited to audio. Video outputs are also available in HDMI or composite formats allowing you to playback your favourite films and TV programmes directly to your home TV. The drDock comes with its own IR remote handset but can also be controlled by the Arcam Solo neo music system and many Arcam AV amps via their handsets too.

Built in a discreet cast aluminium case and supplied with a full complement of connection cables and accessories the drDock can be ready to play your favourite music in minutes. The drDock's USB connection also allows both syncing and charging of your device* while connected to a PC or Mac.

The drDock will be available from authorised Arcam dealers in the first quarter of 2012.

*Charging for iPods / iPhones only

E&OE. All specifications are typical.
