

HIGH PERFORMANCE 2.1 IPOD SPEAKER SYSTEM

WITH IPOD DIGITAL, ADVANCED SOUND RETRIEVER, COMPONENT VIDEO AND FM RADIO.

Precise sound reproduction, warm acoustics.

The iPod Digital function allows the signal to stay digital for longer eliminating the need for extra conversion steps, resulting in higher quality audio reproduction. Dual frame construction suppresses unwanted resonance, resulting in a clear and solid bass sound, and with a compact and lifestyle design concept it can be used in any room in the house. This product features Advanced Sound Retriever, which restores missing harmonics and information lost during the compression of the music source. The first product of its kind to offer a component video terminal, this can pass videos or You Tube on to a display at higher quality.

Stream audio from any Bluetooth capable PC or mobile phone with the optional AS-BT100 adapter, by unplugging your headphones when you arrive home, Bluetooth audio can be streamed to this system with a seamless changeover.

The unique Sound Scape feature allows you to unwind to relaxing and atmospheric noises such as wave, forest, space, brook, café and LP noise, and have the ability to fade these into the music as it plays.

- 2.1 Digital amp and original DSP
- iPod Digital
- Component video output
- Advanced Sound Retriever
- Auto Level Control
- Intelligent loudness
- FM Tuner
- Multi-functional Alarm clock/Radio
