

All the music you want. All over your house.

Sonos ZonePlayer

S5

Room-filling sound, unlimited music, iPhone control

The Sonos® ZonePlayer™ S5 is an all-in-one wireless music system that delivers superior sound, unlimited music, and endless enjoyment — all over the house. Plus, you can control it all with your iPhone®, iPod touch® or iPad™ using the free Sonos Controller apps. Now music lovers can find and play any song—from iTunes® and the Internet—in any room of the house.

The S5 delivers crystal-clear, room-filling sound that rivals much larger, more complicated audio equipment. Plus, the all-digital sound architecture provides precise sound reproduction, just as the artist intended. And setup couldn't be easier — just plug it in wherever you want music. To play more music in more rooms, just add S5s wirelessly.

The S5 is available in both black and white.

Key Features

- Crystal-clear, room-filling sound
- Unlimited music from iTunes and the Internet
- Control with your iPhone & more
- Best-in-class wireless technology for multi-room music
- Simple setup & expansion
- New features and music services with automatic updates

Sonos ZonePlayer S5

Crystal-clear, room-filling sound

The S5's all-digital sound architecture includes 2 tweeters, 2 mid-range drivers and 1 subwoofer driver for bass you can feel. Each speaker is powered by a dedicated digital amplifier and optimized to deliver accurate tonal balance and deep bass. All filter settings, active equalization and time-alignment are done in the digital domain through state-of-the-art DSP circuitry, so there's absolutely no loss of audio quality or energy.

Unlimited music from iTunes and the Internet

The S5 is Internet connected so you can listen to way more music than just what fits on your iPod. The S5 provides instant access to your entire music library, like iTunes, that's stored on any computer. Plus, you can tune in to thousands of free Internet radio stations and millions of songs and stations from the most popular online music services. And you can connect the S5 to an iPod or CD player and listen to those songs throughout your house.

Control it all with your iPhone and more

When it comes to controlling your S5 and the vast array of music on your computer and the Internet, simply reach for your iPhone, iPod touch or iPad. With the free Sonos Controller apps (available on the iTunes App Store), you can search for songs and stations, choose the music and control the volume in as many rooms as you like. The S5 also includes free software for control from your Mac or PC. Or you can get even more control with the dedicated Sonos Controller 200.

Best-in-class wireless technology for multi-room music

The S5 brings great sounding music wirelessly to any room in your house, without a big wiring project. SonosNet™ 2.0, our wireless mesh network technology, provides superior wireless range and performance so the music gets to all the right rooms—near or far—at exactly the right time. That means you can play the same song in every room, perfectly synchronized, or mix it up and play different songs in different rooms, simultaneously.

Simple setup & expansion

Setting up your S5 is incredibly easy — simply plug it in. No technical or wiring expertise required. All you need is a high-speed Internet connection and a router to get started. One ZonePlayer or ZoneBridge™ in your system must be connected to the router and all the rest will work wirelessly. Add more S5s in more rooms without adding wires.

New features and music services with automatic updates

With free automatic software updates you'll always have the newest features and music services to enjoy. Which means your system will keep getting better even after you buy.

TECHNICAL SPECIFICATIONS
